📍 Paldit, Sison, Philippines

SUMMARY

Motivated and detail-oriented Full-Stack Web and Mobile Developer with hands-on experience building responsive websites, business management systems, e-commerce solutions, and cross-platform mobile applications. Experienced with PHP, Laravel, React, Flutter, JavaScript, MySQL, Firebase, Supabase, and cloud deployment platforms. Passionate about writing clean, maintainable code, solving technical challenges, and continuously learning new technologies to deliver high-quality software solutions in collaborative development environments.

CORE COMPETENCIES

Technical Support: Frontend Testing, Bug Tracking, Workflow Troubleshooting

UI/UX & Development: Wireframing, Prototyping, Mockups, User Flows, HTML, CSS, MySQL, Java, Python, Javascript, .NET

Professional Skills: Cross-functional Coordination, Client Relations, Team Management, Peer Training & Mentorship

Programming Languages: PHP, JavaScript, Dart, HTML5, CSS3, SQL, Java

Frontend Development: React.js, Flutter, Bootstrap, Tailwind CSS, Responsive Web Design, UI/UX Implementation

Backend Development: Laravel, PHP, RESTful APIs, Authentication & Authorization, CRUD Operations

Mobile Development: Flutter, Cross-Platform Application Development, Firebase Integration

Database Management: MySQL, MongoDB, Supabase, Firebase Firestore

Cloud & Deployment: Git, GitHub, Vercel, Render, Cloudflare, Firebase, Supabase, Cloudinary

CMS & E-Commerce: Shopify, WordPress, Shopify Theme Customization

Development Tools: Visual Studio Code, Android Studio, Figma, Postman, XAMPP, Laragon

FREELANCE

Full Stack Web Developer

2025 – Present

- Design, develop, and deploy responsive web applications and cross-platform mobile applications using modern development frameworks and technologies.
- Collaborate with clients to gather business requirements, translate project goals into technical specifications, and deliver customized software solutions.
- Build and integrate RESTful APIs, databases, authentication systems, and cloud services to create scalable and secure applications.
- Develop e-commerce websites using Shopify and WordPress, including theme customization and feature enhancements.
- Perform testing, debugging, optimization, and ongoing maintenance to improve application performance, usability, and reliability.
- Communicated technical designs, platform workflows, and system requirements to clients in an accessible manner

CERTIFICATIONS

Cisco Certified: Networking & Cybersecurity

- Demonstrated foundational knowledge of computer networking and cybersecurity principles, including network configuration using Cisco Packet Tracer, IP addressing, subnetting, routing and switching basics, network troubleshooting, and network device configuration. Gained an understanding of cybersecurity fundamentals, including common cyber threats and attacks, security best practices, network protection, and basic risk mitigation techniques.

Google Developer Group: Buil With Ai

- Participated in hands-on workshops and seminars covering Google's AI ecosystem, including Google Gemini models (Gemini Flash and other Gemini variants), Google AI Studio, Google Cloud Console, and AI-powered application development. Gained practical exposure to prompt engineering, integrating Gemini APIs into applications, rapid AI prototyping, and designing AI-powered user experiences using Stitch and Figma.

IT Olympic University of Makati: Computer Networking

- Represented the university as an official contestant in the IT Olympics Computer Networking competition. Demonstrated practical knowledge of computer networking concepts, including network design, IP addressing, routing and switching fundamentals, network troubleshooting, and configuring network devices while competing in technical networking challenges.

Introduction AI & Foundations of Cybersecurity

- learned the fundamentals of AI/ML concepts, model training, and responsible AI use after completing Google's Introduction to Artificial Intelligence course.
- The CIA triad, typical threats and vulnerabilities, and fundamental security frameworks were covered in Foundations of Cybersecurity, the first course in Google's Cybersecurity Professional Certificate.

EDUCATION

University Of Eastern Pangasinan – BINALONAN

Bachelor of Science in Information Technology
(Undergraduate, Transferred)

PANGASINAN STATE UNIVERSITY – URDANETA CAMPUS

Bachelor of Science in Information Technology
University Representative – Computer Networking
Represented Pangasinan State University – Urdaneta Campus in inter-university IT competitions, demonstrating practical skills in computer networking, network configuration, troubleshooting, routing and switching, and network infrastructure.
